5. OVERALL ASSESSMENT

Marketing (recurring) services Paid Media, Social Media, Email Marketing, and AI Receptionist are all priced competitively with clear value escalation between tiers. These represent the strongest part of the pricing structure and create sustainable recurring revenue.	Well-calibrated
Branding services Brand Strategy, Visual Identity, Brand Applications are within market range. Essential tiers are accessible; Enterprise tiers are on the lower end of market but appropriate for a boutique agency positioning.	Competitive
Content services Content Strategy and Copywriting are priced slightly below market averages. Pro tiers represent strong value for clients, which is good for competitiveness but may leave margin on the table.	Slightly low

Design & Development

Underpriced

Websites and especially App Creation are significantly below industry norms. App Creation Pro at \$3,450 for a cross-platform app with backend is roughly 3–5x below what agencies charge. This is the area with the most room for price increases.
